## SKILLS

### WEB DEVELOPMENT

React Node.js Flask JavaScript  
TypeScript Next.js Vite

### MACHINE LEARNING

Python PyTorch Pandas NumPy  
Scikit-learn

### DEVOPS & CLOUD

Docker Git GitHub Jenkins  
Google Cloud Platform n8n CI/CD

### BACKEND DEVELOPMENT

Java PostgreSQL Unit Testing  
Supabase Expo

## LANGUAGES

### FLUENT

French English Vietnamese

### LEARNING

Spanish B1 Italian B1 Japanese A2

## INTERESTS

Photography • Boulderling • Anime/Manga •  
Video Games

- Travel
  - Backpacked 25+ countries
- Hiking
  - Everest Base Camp Trek (3 Passes variant)
  - Portuguese Camino de Santiago
- Cycling
  - Cycled from Hiroshima to Tokyo

## EDUCATION

### M.Sc Applied Computer Science — Concordia University

2025 – Expected 2027

Focus: Machine Learning, HCI, Software Engineering

### B.Eng Computer Engineering — McGill University

2014 – 2019

## WORK EXPERIENCE

### Full Stack Developer Intern

May 2026

*RentAll Construction · Montreal, QC*

- Built a customizable to-do list with product number linking, inline suggestion box for referencing, and autopopulation triggers for high-priority items.
- Refactored UI components for mobile responsiveness across core platform workflows.
- Implemented a real-time sales leaderboard tracking rep performance metrics to drive team competitiveness.

React TypeScript Node.js AWS n8n

### Web Automation Developer Intern

Jan – May 2019

*Broadsign · Montreal, QC*

- Designed a new automation framework to reproduce a live environment for integration and system testing.
- Automated clean deployment and database population of a server using Docker and Bitbucket Pipelines.
- Developed a Python REST tool library for writing unit and integration tests.

Python Docker REST Bitbucket

### Software Developer Intern

May – Dec 2018

*Ericsson · Montreal, QC*

- Automated software installation processes to decrease runtime by 15% using Ansible.
- Implemented a build certification process in Concourse to improve testing team efficiency by 75%.
- Developed automated Oracle backup and restore solution, reducing Concourse jobs runtime by 20%.

Python Ansible Concourse

### Automation SQA Intern

Jan – Aug 2017

*Matrox · Montreal, QC*

- Created automated testing workflow reducing weekly manual testing by 10 hours.
- Integrated Silktest, Jenkins and Testrail using Python to fully automate log parsing, reporting and archiving.
- Set up, configured and managed Jenkins servers and slaves.
- Developed Python and 4Test test suites for functional and performance testing.

Python Jenkins Silktest

## PROJECTS

---

### Concordia Safe Path

[🔗 Demo](#)[🔗 GitHub](#)

Winter 2026

Academic · Human Computer Interaction · Concordia University

- Built campus safety Android app using React Native and Expo with Supabase backend for real-time incident reporting and map-based danger zone visualization.
- Implemented offline-first architecture using AsyncStorage for cache-first data loading and automatic sync on reconnection.
- Applied user-centered design following WCAG accessibility standards throughout the UI.
- Led a team of 6 as tech lead, coordinating tasks and facilitating agile sprint meetings throughout the project lifecycle.

React Native

JavaScript

Supabase

Expo

### Council of Classifiers

[🔗 Demo](#)[🔗 GitHub](#)

2026

Personal

- Built an ensemble classifier achieving 80% CEFR classification accuracy via majority voting across multiple pre-trained models.
- Flask REST API with React frontend, loading pre-trained models (from the "One model to grade them all" project) from HuggingFace Hub.
- Containerized deployment on Google Cloud Run with continuous integration from GitHub.

Python

React

Flask

GCP

### One Model to Grade Them All

[🔗 Demo](#)[🔗 GitHub](#)

Fall 2025

Academic · Natural Language Processing · Concordia University

- Compared 3 machine learning approaches for automatic CEFR classification of English learner writing.
- Trained models on EFCamDAT corpus and evaluated on multiple out-of-domain corpora.
- Implemented Naive Bayes, Word2Vec, and RoBERTa (fine-tuned) models.

Python

PyTorch

NLP

RoBERTa

### Multimodal Torso Image Reconstruction

[🔗 GitHub](#)

2019

Academic · Capstone Project · McGill University

- Developed PyQt5 desktop application for medical visualization and registration for scoliosis surgical planning.
- Fused three imaging modalities (MRI/DICOM, X-Ray/VRML and Surface Topography) into a unified 3D torso.

Python

PyQt5

## ADDITIONAL EXPERIENCE

---

### French Language "Francisation" Teacher

2024 – Present

CEGEP Marie-Victorin · Montreal, QC

- Delivered French language instruction to adult newcomers following the Quebec Ministry of Education Francisation curriculum.
- Designed and adapted lesson materials to accommodate diverse linguistic backgrounds and proficiency levels.

### English Language Teacher

2020 – 2022

Borderlink / SophiaZemi School · Okayama, Japan

- Taught English conversation and grammar to elementary and junior high school students across multiple schools in Okayama Prefecture.
- Developed engaging lesson plans and cultural exchange activities for classes of up to 30 students.
